PRICING

Total charges for each individual invoice, including transportation, packing and all other applicable accessorial charges except third party services, valuation charges, storage-in-transit will be based on **39%** of the charges published in Tariff STB HGB 400N as of January 1, 2002.

Charges for storage –in-transit, warehouse handling, pick-up to and delivery from storage-in-transit will be based on **55%** of the charges published in Tariff STB HGB 400N as of January 1, 2002.

A fuel surcharge will apply to all net transportation charges including, but not limited to, linehaul transportation and pick-up and delivery from storage-in-transit and is calculated based on the following:

The application of any fuel surcharge will be determined by the “national U.S. average” price per gallon based on the Department of Energy (DOE) Energy Information Administration’s (EIA) survey of “Weekly On-Highway Diesel Prices” for the first Monday of each month. This price may be obtained by calling the DOE Fuel Hot Line at 202-586-6966 or via the DOE Internet web site at www.eia.doe.gov. In the event that the first Monday of the month is a Federal holiday, the fuel surcharge will be based on the DOE price available on the next subsequent business day (Tuesday).

The “national U.S. average fuel price”, as determined above, will be applied to the fuel price adjustment ratio matrix shown below to determine the applicable fuel surcharge percentage. The applicable fuel surcharge will apply to the net line haul transportation charge and will be effective the 15th of that month through the 14th of the following month. The resulting charge is in addition to all other applicable transportation charges.
